ENERGY EFFICIENCY SOLUTIONS
ENGINEERING SERVICES & INSTRUMENTATION

The George T. Hall Company (GTH) offers a number of products and engineered solutions to help you conserve energy, save money and improve the environment. With our experience in Industrial and Commercial spaces, and our proficiency with local and federal regulations and energy rebates, we have the expertise required to recommend, design and implement the right 'green' solution to meet your needs.

ELECTRICAL ENERGY

There has never been a better time to go green. Increasing energy prices, combined with the rebates offered by many local utilities, make payback periods shorter than ever before. GTH offers a number of energy saving controls and systems for both Commercial and Industrial spaces. Many of these solutions can also be integrated throughout the facility to provide real-time information to both maintenance and corporate personnel.

Building Automation Systems | Variable Frequency Drives | Electrical Submeters | Power Meters | Energy Dashboards | Solar Panels

NATURAL GAS & EMISSIONS

Combustion controls have advanced considerably in the past 10 years. New technology can not only reduce energy consumption, but also improves system accuracy and extends the life of factory equipment. Combustion System retrofits typically have a very high ROI due to their energy savings and the flexible rebates offered by many utility agencies but in many areas of California, these upgrades are mandated by local air quality districts. Whether you are looking to comply with local or federal regulations or just reduce your carbon footprint, our staff of Outside Sales and Field Engineers can customize a solution to meet the specific needs of your facility.

Natural Gas Meters | Fuel-Air Ratio Systems | Low NOx Burners | Parallel Positioning Controllers | Combustion Analyzers | Power Meters

GREEN SERVICES

In addition to the products and systems listed above, GTH also offers a number of green services to assist with your energy initiatives. Contact the GTH branch near you to schedule an onsite energy evaluation to determine what options are a fit for your facility!

Energy Evaluations | Source Testing Services | Burner Management System Start-Up | Energy System Engineering | Dashboard Design

FEATURED PARTNERS

PRODUCTS

Honeywell Flame Safeguard Products | Honeywell Paperless Recorders | Honeywell Temperature Sensors
Maxon Burners | Maxon Combustion Efficiency Systems | Phoenix Wireless Solutions

PROFESSIONAL ENGINEERING SERVICES

SCADA Solutions | Data Acquisition & Seamless Integration | PLC & HMI Programming | OPC Development
Software Integration | Wireless Audits | Project Management | Training | Energy Evaluations | Software Upgrades
