Fixed-Point Industrial Gas Detection

Protecting People, Property and Environment from Hazardous Gases
Honeywell Analytics Offers Enhanced Safety and Productivity for Industrial Applications

Look to Honeywell Analytics, the world-leading specialist in gas detection and sensing technology, for a complete range of fixed-point gas and flame detectors, controllers and accessories that provide the best assurance of protection from toxic and flammable gas threats. When you do business with us, you benefit from our comprehensive approach to safety, one that's also focused on increasing your company's productivity and performance, operational uptime and profitability.

Decades of experience and a commitment to innovation have ensured that each of our products is manufactured to the highest standards of quality and reliability. The result is total protection for people, property and processes—in the toughest conditions and the most extreme environments.

XNX™ Universal Transmitter
Supports all Honeywell gas sensing technologies (point, open-path infrared, cat bead, electrochemical) and industrial communications (HART®, MODBUS®, FOUNDATION® Fieldbus).
Honeywell Analytics is the Name for Gas Detection, Upstream and Downstream

It’s quite an accolade for Honeywell Analytics that Sieger has become the brand name synonymous with gas detectors used in extreme environments and difficult conditions.

When the consequences of a broken pipeline, valve leak or other system failure can be massive, even disastrous—and with help far away—it is important to prevent problems from initially arising.

Honeywell Analytics’ gas detection systems, combined with our global technical support network, provide the best reassurance of safety possible for those who work at production facilities and for those who live nearby.

Honeywell Analytics’ Industrial line of gas detectors are renowned for robust construction, reliable performance and wide-ranging analytical capabilities. Our gas detectors are used extensively on floating production storage and offloading (FPSO) vessels, as well as onshore and offshore oil and gas facilities. When the very best fixed-point gas detection is required, Honeywell Analytics is the name that safety managers request. Whether the need is for gas detectors, complete gas detection systems, or an integrated fire and gas system, Honeywell Analytics has the solution.

Gas Detectors & Transmitters

- **XNX**
- **Searchpoint Optima Plus with XNX**
- **Series 3000 MkII**

Controllers

- **HA-20/HA-40**
- **HA-71**
- **XLS3000**

Flame Detectors

- **FD Series**
  - UV
  - UV/IR
  - Triple IR
**Water and Waste Water Treatment Applications**

**Quality Solutions for Large or Compact Installations**

Environmental research shows that wastewater gases can undermine the health and well-being of residents, fish and aquatic life, and even affect wastewater treatment processes. Wherever wastewater gases collect, toxic and combustible gases pose a threat. Plant workers must also be on guard against the danger of asphyxiation in confined spaces, and the serious nuisance of gaseous odors. In every case, a strategic gas monitoring program is a must. Whether it’s a large or compact installation, Honeywell Analytics can deliver a solution that’s reliable, flexible, innovative and cost effective. Put your trust in us and we’ll do the job that earns your respect.

**Gases Monitored**
- Hydrogen Sulfide
- Carbon Dioxide
- Chlorine
- Sulfur Dioxide
- Ozone
- Methane
- Solvent Vapors

**Gases Monitored**
- Hydrogen Sulfide
- Carbon Dioxide
- Chlorine
- Sulfur Dioxide
- Ozone
- Methane
- Solvent Vapors

**Typical applications:**
- Anaerobic Digesters Both Fixed & Floating Cover
- Digester Control Building
- Digester Gas Processing Rooms
- Underground (piping) Tunnels Containing Natural or Sludge Gas Piping
- In-vessel Composting
- Alcohol Storage
- Incinerators
- Chlorination Room
- Chlorine Storage Tanks & Room
- Ammonia Storage Tanks & Pipes
- De-chlorination Processes
- Sulfur Dioxide Storage Tanks
- Wet Wells
- Pumping Stations
- Screen Facilities (Course & Fine)
- Flow Equalization Tanks
- Grit Removal Tanks
- Pre-Aeration Tanks
- Primary Sedimentation Tanks
- Oxygen Aeration Tanks
- Scum Handling Building
- Scum Pits
- Scum Pumping Areas (Wet & Dry Side)
- Sludge Thickener
- Sludge Storage Areas
- Sludge Blending Tanks and Holding Wells

**Gas Detectors & Transmitters**
Reliable Detection and Protection

The superior sensing technology in Honeywell Analytics gas detection products make it suitable for a wide variety of industrial applications within chemical, petrochemical, agriculture, printing and other industries. Consult Honeywell Analytics for a practical and cost-effective approach to your gas detection requirements.

Honeywell Analytics’ extensive selection of gas sensing devices offers the industrial safety manager a “one-stop” solution for choosing a compatible gas detection system—with the flexibility to monitor gas hazards in a large area or several discrete locations from a convenient central site.

Specialty Chemicals Industry
**Gases monitored:** TDI, MDI, HDI, MMN, N₃H₄, TBA, TBP, XOI, MDA, HCN, SH₂, SnH₂Cl₂, B₃H₆, GeH₄, AsH₃, PH₃, H₂Se, WF₆, SnH₃, Boron Trifluoride, Nitrogen Trifluoride, SF₅, CH₂F₂, CH₃F, CF₃, C₂F₆, Refrigerants, R11, R12, R22, R134, R134a.

Inorganic Chemicals Industry
**Gases monitored:** Hydrogen, Acetylene, Hydrogen Fluoride, HNO₃, HCl, HPO₃, Phosgene, H₂O₂, F₂, Br₂, Cl₂, HBr, SH₂, SH₂Cl₂, BF₃, Nitrogen Dioxide, Nitric Oxide, O₂, Carbon Monoxide, Sulfur Dioxide, Oxygen Deficiency with Helium, Medical Gases & Ethylene Dioxide.

Plastics and Fibers Industry
**Gases monitored:** Olefins, Alkenes, Akinenes, LNG, Aromatics, Toluene, Phenol, Benzene, Mineral Acids, Halogenes, Ammonia, Oxygen, Carbon Monoxide, O₂.

Agricultural Industry
**Gases monitored:** Hydrogen, Acetylene, Hydrogen Fluoride, HNO₃, HCl, HPO₃, Phosgene, H₂O₂, Fluoride, Br₂, Cl₂, HBr, SH₂, SH₂Cl₂, Boron Trifluoride, Nitrogen Dioxide, Nitric Oxide, O₂, Carbon Monoxide, Sulfur Dioxide, Oxygen Deficiency with Helium, Medical Gases & Ethylene Dioxide.

Printing Industry
**Typical Applications:** Exhaust lines, exhaust cleaning, press rollers washing, system room & solvent stocks.
Food Processing/Cold Storage Applications

Manning Systems by Honeywell Analytics: Robust, Reliable and Easy to Maintain

Honeywell Analytics Manning brand gas detectors are ruggedly constructed for long-term reliability and ease of maintenance in the harsh industrial environments typical of food processing and storage plants. Applications include fruit and vegetable processing, meat and poultry processing, baking and other energy intensive operations that utilize gas.

Our broad selection of electrochemical and infrared diffusion-type gas detectors offer excellent choices for long-term, trouble-free operation. Unlike sample draw systems, diffusion sensors can continuously monitor an entire facility without concern for pump or filter maintenance, sample dilution or moisture in sample draw lines. Degradation inherent to sample draw systems is not a concern with the solid reliability of diffusion devices. This is especially apparent in facilities with continuous high moisture levels.

Honeywell Analytics goes beyond the challenge of regulatory compliance to protect your company’s plant, people, processes and environment—and ultimately, its bottom line.

Gas Detectors & Sensors

- AirScan IR-F9
- EC-F9-NH3

Controllers

- HA-40
- HA-71
- AirAlert™ 96d

Typical Applications in Food Processing/Refrigeration:
- Cold Storage
- Engine Rooms
- Processing Areas
- Vent Line Relief
- Emergency Shunt Trip
- Personnel Protection

Gases monitored:
- Ammonia
- Carbon Dioxide
- Carbon Monoxide
- R-22
- R-407
- R-422d
- R-410a
- R-404a
- R-134a
- R-507
- Chlorine
- Chlorine Dioxide
Continuing support to protect your business

Technical Services
Honeywell Analytics provides the best-quality gas detection equipment in the world so that businesses can get on with doing what they do best – running their business. Our objective is simply to take care of your safety requirements and to minimize any downtime gas safety issues. Using the best quality equipment is essential, but all equipment needs to be properly serviced and maintained. Honeywell Analytics provides a range of service levels to ensure the support needed to keep businesses running safely.

Systems Integration
Our Systems Integration Group provides a complete range of control and visualization services for our customers including network design, project management, system installation, commissioning/testing, and customer training.

Commissioning
For extra reassurance, systems can be installed and commissioned (or tested) by qualified Honeywell Analytics Service Engineers. Our specialists will check for installation, as well as provide any training that may be required.

Equipment Rental
There’s no need to take risks with safety. If equipment purchases can’t be justified or needs are difficult to assess, equipment can be rented and configured to specific site requirements. Equipment is available on either short or long-term lease arrangements.

Field Calibration
All precision equipment must be regularly serviced, calibrated and maintained. Honeywell Analytics offers full service technical support for the full range of fixed and portable equipment, as well as training in the use and maintenance of our instruments.

Field Service
Our Field Service team is on call 24 hours a day, 7 days a week, to ensure site safety and that business performance is never compromised. We have a global network of fully qualified and highly skilled engineers ready to meet any emergency need.

Preventive Maintenance
Proper maintenance will maintain performance and enhance the bottom line. Honeywell Analytics offers a customized Preventive Maintenance Program, performed by skilled engineers, to keep equipment operating at peak performance.

On-site Maintenance
Having a Honeywell Analytics On-Site Service Engineer on-call eliminates the need to employ and train equipment support staff. An On-Site Service Engineer can respond immediately to inquiries and promptly resolve problems, minimizing downtime.

Honeywell Analytics Global Service Team excels at finding solutions to technical issues and ensuring that operational uptime is maximized.

Specialized Training
Honeywell Analytics offers on-site training world-wide, which can be customized to meet the needs of your specific equipment, site application and attendees.

Extended Warranty
Our Extended Warranty Program provides customers with confidence, convenience and return on investment. Combined with our Preventive Maintenance and Calibration contract, we provide one of the most comprehensive maintenance programs available in the industry.
Honeywell Analytics Lines of Business

Commercial
Gas detection from standalone units to fully engineered, multi-point systems, all offering cost-effective regulatory compliance
- Applications: parking structures, chillers, mechanical rooms, office towers, commercial buildings, shopping centers, swimming pools, golf courses, schools and universities, laboratories

Industrial
Renowned Sieger and Manning gas detection systems with advanced electrochemical, infrared and open path sensing technologies
- Applications: oil and gas, cold storage, water/wastewater treatment, chemicals, engine rooms, plastics and fibers, agriculture, printing and light industrial

Portables
Single or multi-gas Lumidor and other premium detectors with compact, lightweight designs ranging from simple alarm only units to advanced, fully configurable and serviceable instruments
- Applications: underground utility and electricity ducts, boiler rooms, post-fire sites, sewers, industrial plants, industrial hygiene, first responder teams, remote fleets

High Tech/Government
A complete portfolio of gas and chemical detection instrumentation including infrared spectroscopy (MST) with no cross interference, to Chemcassette paper-based solutions (MDA Scientific) offering detection down to parts per billion
- Applications: semiconductor manufacturing and nanotechnology, aerospace propulsion and safety, specialty chemicals industry, research laboratories, emergency response

Technical Services
24/7 global network includes post-sales service and Systems Integration teams
- Emergency call out, service contracts, on/off-site repair, training and commissioning
- Complete range of spares, consumables and accessories
