

## A-T Controls - High Performance Valves and Actuators

A-T Controls provides high performance valves and actuators for Industrial Applications. With their extensive inventory and efficient manufacturing practices, A-T Controls has some of the shortest lead times in the industry, even for custom assemblies. Plus, every actuator and assembly is tagged with a serial number upon completion which can be used to easily trace the life of the product. *Let GTH show you the quality and value of A-T Controls on your next valve application!*

### V-Full Port Segmented Control Valves

A-T Controls "V" Series Control Valves offer precise control with the simplicity and sealing features of a ball valve. We offer these segmented valves in sizes ranging from 1/2" to 4" in a 3-piece design, and 1" to 6" in flanged models. The standard "V" notch options are 30 degrees and 60 degrees.

#### V-Full Port Segmented Valve Features:

- TA-Luft Certified Low Emissions
- Wide range of sizes in 3-piece and flanged
- 316SS and WCB

### High Performance Butterfly Valves

A-T Controls offers manual and automated high performance butterfly valves. Automated versions are available with pneumatic spring-return actuators, double acting actuators or electric actuators with optional explosion-proof housing. They are stocked in sizes from 2" to 24" but custom sizes are available through special order.

#### Features and Benefits:

- Application-specific, custom order body and seat materials
- RTFE and firesafe seat designs offer shutoff to full ANSI/ASME Class 150# & 300# standards
- Blow-out proof stem design
- Stem design facilities direct mounting of actuators through 12"
- Application-specific stem packing
- Internally cast travel stop to limit seat damage

### FM Approved Valve Packages

A-T Controls offers FM approved automated valve assemblies for liquid and gas shut-off applications. The components include a spring-return automated ball valve, explosion-proof limit switch and solenoid pilot valve. These assemblies provide for a compact fuel gas safety shut-off system that complies with FM class 7400, 7420, and 7422.

*Call GTH today for more information on these valves or the combustion regulations in your area!*
