

UPS Backup Power Solutions

UPS or uninterruptible power supplies have been increasingly important in industrial environments. Whether you need backup power for a single PC or an entire data center, GTH has the equipment you need to protect your power requirements.

by Schneider Electric

The award-winning **Smart-UPS** unit from APC by Schneider Electric is the most popular UPS in the world for servers, storage and networks. Trusted to protect critical data and equipment from power problems, the UPS supplies clean and reliable network-grade power. Available in a variety of form factors and classes, there is a model for every application and budget.

Smart-UPS On-Line provides high density, true double-conversion on-line power protection for servers, voice/data networks, medical labs and light industrial applications. This product family provides customers with a reliable source of uninterruptible power even in demanding power environments, including very wide input voltage window, extremely tight output voltage regulation, frequency regulation, internal bypass and input power factor correction.

The innovative UPS Selector from APC by Schneider Electric can recommend the UPS solution that is right for your facility based on your devices, power requirements, required run time and other variables.
