

Utility Rebates and Incentive Programs

Do you have old and outdated equipment? Are your energy bills too high? Are you looking for solutions for your business that can save you money? If you answered yes to any of these questions, it is time to start researching the rebates and incentive programs offered by your local utility. The sales staff at GTH are proficient with the energy saving products and retrofits that are the best fit for your facility.

PowerShift is the new name for the Energy Efficient products and services now offered by Nevada Energy. The goal of PowerShift is to help business customers save more on their monthly energy bills through commercial energy services, smart thermostat energy management, time-of-use rates, and more! Their commercial energy services offer incentives for both energy and natural gas retrofits:

Electrical Retrofit Incentives - NV Energy offers both prescriptive and custom incentives for qualified retrofits and equipment purchases that save electrical energy. Applicable improvements include lighting, cooling, commercial kitchens/refrigeration, transformers/UPS, and miscellaneous measures.

Natural Gas Incentives - NV Energy offers prescriptive and custom incentives for qualified retrofits and equipment purchases that save natural gas. Applicable improvements include HVAC, commercial kitchen, and miscellaneous measures.

SOUTHWEST GAS

The Southwest Gas Company is always available to assist industrial accounts of all sizes with equipment and site specific evaluations to help you maximize your energy improvements. Their team of Industrial Gas Engineers (IGE) offer a number of services including:

- Analysis of existing energy bills
- Analysis of electric and gas rate schedules
- Simple payback and life-cycle equipment comparisons for a variety of applications including boilers, cogeneration, and water pumps.

By involving Southwest Gas at the early stages of your relocation or retrofit, you can take advantage of all of the energy saving benefits available to your business.
