

A Year in Review

2015 was an exciting year for GTH. We significantly grew our service offering and expanded our project portfolio in many industries including Water and Wastewater, Aerospace, Food and Beverage, and Pharmaceutical. GTH has also aligned with some exciting new vendor partners that will allow us to better serve our customers in 2016 and beyond.

NEW Changes to georgethall.com

We made some significant content and navigation changes to georgethall.com this year. Most notably, we have added [expertise subpages](#) to highlight our experience in key industries. These pages provide detailed information on the products and services we offer in these areas and, in some cases, they show case studies for reference. We have also added new [Custom Product pages](#) to showcase some of the new custom GTH products that we have designed and built for sale including our new [Temperature Uniformity Survey Case](#) complete with software to comply with AMS 2750 regulations.

New Products and Vendors

Many of our featured vendor partners released new and innovative products in 2015 designed to improve efficiencies and enhance operations. The new [Honeywell SLATE Integrated Combustion Controller](#) brings together configurable safety and programmable logic in a configurable and modular package. This system is the perfect fit for commercial and industrial boilers, process heating applications as well as burners, kilns, and ovens. Honeywell Measurement and Control released the new [DR Graphic Recorder](#). These new paperless recorders fit the footprint of the popular DR45 series circular chart recorders with all of the features and benefits of electronic data instruments. With much fanfare, Watlow unveiled their new [F4T Controllers](#) in 2015. These instruments combine the flexibility of a modular I/O controller with a high resolution graphical user interface and endless configuration options. In addition to new products, GTH was proud to add [Badger Meter Flow Instrumentation](#) to our esteemed list of vendor partners. Their offering of Mechanical Flow Meters, Electronic Flow Meters, and customized flow solutions are well known throughout the industry for their reliability, product quality, and unsurpassed customer support.

Solution Spotlights

Our monthly [Solution Spotlight](#) program highlights GTH products and services and also offers valuable insights into new technology and innovations in Industrial and Commercial control integration. Here is a look back on some of Solution Spotlights from 2015. Click a Spotlight to download!

Looking forward...

There are many exciting changes ahead in 2016.

We have some new GTH Custom Products ready for release in Q2 of 2016, as well as an exciting new vendor partner that will significantly enhance our offering to the Heat Treat and Aerospace industries. As always, we will strive to offer our valuable customers the very best in products, services, and technical support in 2016 and beyond.

Happy Holidays from all of us at GTH!
