

The new ControlEdge programmable logic controller (PLC) from Honeywell is the flagship addition to their Industrial Internet of Things (IIoT) offering. When integrated with Experion, ControlEdge offers the following advantages:

- **Minimized Integration Costs** with auto-configuration of data points
- **Shortened Downtime** through integrated, single-source product support
- **Reduced Inventory Requirements** with universal digital & analog I/O cards
- **Increased Operator Effectiveness** with common HMI across system applications
- **Decreased Risk** with embedded ISA Secure Level 2 cybersecurity
- **Lower Cost of Ownership** through extended system lifecycle

In addition to Experion, ControlEdge is able to integrate to devices across your facility with its open, IIoT-ready platform. Use of the OPC UA protocol offers smooth integration to a broad range of instruments while providing built-in cybersecurity. Interoperable multi-level and multiplatform open communication provides flexible and scalable design, enabling standardization with less hardware.
