

Wonderware SmartGlance

With the Wonderware SmartGlance mobile information app you can instantly view real-time plant data from a variety of industrial data sources on mobile smartphones, smart watches and tablets. Tie into the Internet of Things by feeding SmartGlance with your historian, process control equipment or other devices that generate operational data. Download in minutes from your favorite app store and securely view, analyze and share production data untethered.

Industrial Insight on the Go

Mobile reporting provides real-time access to critical KPIs and process or operational data via popular smartphones, tablets and wearables. This can reduce costs and improve productivity while enabling faster and better decision-making. Users are better equipped to review, analyze and collaborate.

Wonderware SmartGlance Mobile Reporting is an industrial application that gathers real-time process data and generates Key Performance Indicators and makes them available through a variety of mobile devices. It connects your mobile phone with any corporate or production system data source.

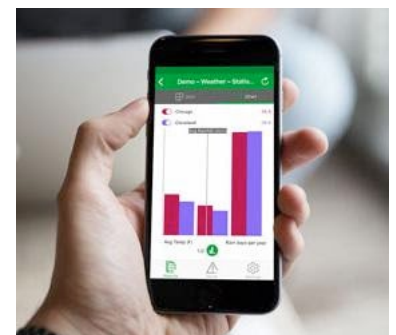

Virtually any electronic data that you now get at your desktop can be transformed into dynamic graphical reports for real-time viewing on your mobile smartphone or device.

- View real-time or historical data reports
- View Key Performance Indicators (KPIs), track changes, take action and collaborate with others -- even outside of Wonderware SmartGlance
- Arrange, sort and filter reports based on your priority

Download the SmartGlance App

Anywhere, anytime and on any device:

- Access to KPIs, anytime, anywhere, on any device
- Expanded operational awareness
- Accelerated decision making
- Enhanced collaboration
- Improved agility
- Reduced operational costs and improved productivity

Download the SmartGlance app from the Apple App Store or Google play:

Note: if you want to access data directly from an external datasource such as Microsoft SQL Server - rather than [Wonderware Online](#) - you will also need to [download the mobile reporting connector](#).

The New GTH Industrial Internet of Things (IIoT) Webpage is Live!

The new GTH Industrial Internet of Things (IIoT) webpage contains information on Wonderware, Parsec, Inductive Automation and other key GTH partners that are leading the way in IIoT technologies. Continue to check back for new links and videos as this market continues to grow and expand into industrial manufacturing opportunities!
