A Year in Review at GTH

PROCORE™
CLOUD-BASED CONSTRUCTION SOFTWARE

2018 was a busy year at GTH. In an effort to improve our internal processes, we implemented Procore, an internal project management software. Procore allows our personnel to collaborate and share project data in a secure cloud-based environment. Project drawings, RFIs, daily logs, and Gantt charts are now all updated in real time to maximize internal efficiencies. Client file access is also available to improve communication and expedite approvals of drawings and submittals. We are grateful for the support of our customers during our continuing evolution and we look forward to serving you in 2019!

2018 Featured Spotlights

Migrating from Paper to Electronic Recordkeeping
The growth of paperless or electronic data acquisition in industrial applications has exploded in the last 10 years. This is largely due to the increased cybersecurity surrounding the transfer and storage of electronic data but there are a number of other benefits. *Click here to learn more...*

Mobile Flame Safeguard Notifcations
Elevate your thermal insight quotient with the new Thermal IQ from Honeywell. Developed by the thermal process experts, Thermal IQ is a remote monitoring solution that securely connects your combustion equipment to the cloud, making critical thermal process data available anytime, anywhere, on any smart device. *Click here to learn more...*

Standard Test Method for Conducting Temperature Uniformity Surveys
When you roll your cart into a gas fired furnace, you are relying on your furnace to provide an even amount of heat to your product to ensure a consistent temperature on the material. But how can you be sure? Performing a temperature uniformity survey is your first step. *Click here to learn more...*

2018 Solution Spotlights
Our monthly Solution Spotlight program highlights GTH products and services and also offers valuable insights into new technology and innovations in Industrial and Commercial control integration. Here is a look back on our Solution Spotlights from 2018.

- Honeywell SLATE
- Migrating to Smart Manufacturing
- IIoT Integration with ControlEdge PLC's
- Electronic Data Acquisition

- Mobile Flame Safeguard Notifications
- Industrial Instrument Repair
- AQMD Rule 1147 // CFR Part 11
- Industrial Flame Monitoring

- Achieving OEE
- Standard Test Method for Conducting TUS
- Watlow F4T Process Controller
