

## A Year in Review

2016 was an exciting year for GTH. We significantly grew our portfolio of projects in key industries including Water/Wastewater, Heat Treat, and Food and Beverage. Our Field Service team continues to grow and we expanded our Anaheim panel shop to better accommodate larger panels and project work. In addition to achieving Diamond status with Honeywell Process Solutions and Voyager status with Honeywell Thermal Solutions, we also grew our business as a certified integrator with Schneider Electric, Wonderware, and Rockwell Automation. These new skills and alliances will allow us to better serve our customers in 2017 and beyond.

## Our Featured Solution Spotlights

### UL Listed Control Panels

The George T. Hall Company panel shop personnel in Northern Nevada and Southern California specialize in building quality control panels that incorporate innovative products and technology. We are qualified to build both UL508A and UL698 panels for standard and hazardous industrial applications.

### HMI and Industrial PCs

Now is the perfect time to step up your process control and data collection with a new HMI or Industrial PC. The new Magelis GTU Wireless LAN display from Schneider Electric supports both station modes and access point modes. It also works as a mobile solution when used with the Vijeo Design Air app for your smartphone or tablet. If you are looking for an Industrial PC, the Phoenix Designline Series offers enhanced processor performance and IP65 protection in a modern, slimline design. [Click here to learn more...](#)

### Honeywell's New Industrial Thermal Solutions (ITS) Division

Honeywell ITS is the new designation for their thermal product line. This new division includes some of the industries leading products and system solutions such as Honeywell flame safety products, Eclipse burners, Hauck combustion solutions, Krom Schoder valves and regulators, and Maxon burners and gas valves. Honeywell ITS streamlines integration, installation and end-user interaction while improving efficiency and performance across their product lines. [Click here to learn more...](#)

## 2016 Solution Spotlights

Our monthly Solution Spotlight program highlights GTH products and services and also offers valuable insights into new technology and innovations in Industrial and Commercial control integration. Here is a look back on our Solution Spotlights from 2016. [Click a Spotlight to download!](#)

## Looking forward...

There are many things to celebrate in the coming year. 2017 marks our 85th anniversary so each month our blog will highlight a company milestone or historical anecdote. We are grateful for the company and individuals who have supported us since our inception in 1932. George Hall's favorite mantra is still true to this day - we are "The House that Service Built".

*Happy Holidays from all of us at GTH!*
