SOLUTION SPOTLIGHT

George T. Hall Company

www.georgethall.com

Wireless Data Communication

The popularity of industrial wireless technology has continued to grow in the past few years with the increasing need to connect industrial devices and the Internet of Things (IoT). The George T. Hall Company is proficient in wireless technologies as well as system integration and cybersecurity that these installations require. Contact the branch near you for more information!

Phoenix Contact FL WLAN 1101 Industrial Wireless Ethernet

PHOENIX CONTACT INSPIRING INNOVATIONS

The new FL WLAN 1101 Industrial Wireless Ethernet device from Phoenix Contact connects your machines & devices while saving space, installation time, and material costs. The FL WLAN 2201 has dual internal antennas, IP-rated housing, and simple through-hole mounting as well as a number of user-friendly features:

- 802.11n technology with backwards compatibility to 802.11a/b/g networks
- Up to 300 Mbps data throughput
- Full-function access point, repeater, client functionality
- Simultaneous access point and client or dual-access point function

Honeywell XYR 3000 I/O Module

Honeywell PROCESS SOLUTIONS

The Honeywell XYR 3000 family of wireless multiplexer input/output (I/O) modules, gateways and modems are designed to improve plant safety, equipment reliability, regulatory compliance, and process efficiency. XYR 3000 provides a simple means of implementing a wireless solution and supports a wide range of communication protocols to offer a greater choice of instrumentation for industrial wireless networks. *Click here to learn more.*

GTH and the Internet of Things (IoT)

The Internet of Things (IoT) is gradually making its way into industrial applications. Wireless technology, mobile HMI's, and interactive dashboards are being developed by a number of our manufacturer partners including Wonderware, Schneider Electric, and Honeywell.
In addition, GTH is now an integrator for Parsec and Inductive Automation.

Are you interested in knowing what IoT can do for your facility?
