

**GEORGE T. HALL
COMPANY**

CONTROLS • AUTOMATION • SOLUTIONS

George T. Hall (GTH) is a full-service control solutions provider. With design capabilities, programming expertise, instrumentation services, and control panel manufacturing, we create the control solutions at the core of critical industrial applications.

AUTOMATION SOLUTIONS FOR GREATER PRODUCT QUALITY AND SYSTEM EFFICIENCY

Applications We Serve

Coating Tank

Test Stand Controls

Heat Treatment

AEROSPACE

Aerospace manufacturers require modern, reliable control systems while meeting strict regulatory and compliance standards. For decades, GTH has supported aerospace operations with advanced automation, process and thermal solutions and improve safety, performance, and efficiency.

NADCAP DATA LOGGING

GTH develops SCADA based data logging systems that support NADCAP compliance across heat treatment and aerospace processes. Our solutions capture, archive, and visualize critical data to ensure traceability, audit readiness, and reliable monitoring.

FURNACE TEMPERATURE CONTROL

We implement PLC and HMI solutions for multi-zone furnace control delivering precise PID temperature regulation and stable thermal profiles for demanding aerospace heat treatment and thermal processing applications.

UL-508A CONTROL PANELS

Our UL-508A certified team designs and builds industrial control panels to meet demanding aerospace requirements. From concept through testing, we deliver safe reliable panels tailored to complex automation and power distribution systems.

POWER DISTRIBUTION & TESTING

GTH designs and integrates high-power electrical distribution and load testing systems for aerospace test environments, supporting component validation, power management, and reliable operation for demanding product testing applications.

PARTNERSHIPS

With George T. Hall, there's a century of expertise built into every solution. We bring experience and intuition to automation challenges and create sustainable, reliable solutions for our customers. We'll work within the framework of your existing technology to modernize operations or design new solutions when you're looking to expand. GTH is your design-minded, solution-oriented automation partner, let us put our experience to work for you.

Certifications & Alliances

Eurotherm[®] by Watlow **Honeywell**

State Contractors Licenses
CA #920775 | NV #0068362

Public Works Registration
CA #1000007118

UL508A Certified
#E120534

Hear why our clients continue to work with GTH:

"George T. Hall is absolutely one of our best contractors. From proposal to delivery, they're clear, on-schedule, and able to produce a solution for us. With us, they started with control panels, and now perform startup procedures, wire checks, and integrations with other equipment - they're not only delivering products but have a vested interest in ensuring our solution works well for us. Any time I get the GTH team on a project, I know it will be taken care of."

Quality

"Quality is most important to us. If something isn't right, we would rather do it ourselves. GTH holds our standard for quality high, making them easy to trust."

Reliability

"Their commitment to follow through and get things done when they're supposed to is impeccable. They are always on or ahead of schedule."

Expertise

"It's the knowledge they bring as a system integrator about how to program products specifically to our needs in a way that adds value to us."
